

November 5, 2009

Dear AutoClaims Direct,

I want to thank you for the generous donation. My science classes are going to greatly benefit from all the materials at our fingertips. We will use the many manipulatives to explore the world of science. We can use the live specimens to truly understand how organisms act and interact in their environment. There are so many needs that are often unmet in the science classroom because of the sheer cost of supplies. You have made our experience here in class that much better because of your donation. It is amazing that you are able to donate so much to our school and for that we are grateful. My principal wants to also extend his thanks to you for making things better here in the Basin School District.

I hope that you have a great year and we intend on doing so in the classroom. You can anticipate thank you letters from my students in the future, telling you how much they enjoyed the materials.

Sincerely,

Natalie Mendenhall

Science Educator  
Basin School District
